eTurns TrackStock
Manage Lite

Mobile app for tracking usage and auto-replenishing stockroom and truck inventory

TrackStock Manage Lite includes all the benefits of TrackStock Replenish, which is our mobile ordering app, plus the ability to track usage, manage consignment, and auto-replenish with smart digital orders that take into account your usage and min/max settings.

eTurns TrackStock offers 4 levels of automated replenishment

eTurns TrackStock
Manage Lite

Mobile app for tracking usage and auto-replenishing stockroom and truck inventory

Reduce stockouts. Know your quantity on hand.

Scan items as they are used. The app records the usage and continually compares the quantity on hand with the minimum, and triggers an automated order up to the maximum.

Manage inventory on service trucks

Scan items that you want to reorder or scan items that you use on a job. TrackStock will track the parts you use and create auto-replenishment orders based on min/max levels. Manage parts from any supplier with our supplier-independent app.

Reduce procurement costs by 90%

TrackStock sends automated orders when replenishment is triggered by min/max levels, preventing the need to type in POs. Plus, the same order that is automatically sent to the supplier for replenishment becomes an import template for the end user's accounting department to import into their business system, eliminating all data entry. QuickBook integration is available.

Manage serial/lot numbers and expiration dates

Manage serial number inventory. Receive email notifications before lot numbers and expiration dates expire.

Get over 30 useful reports. Schedule and send them in email alerts

- Reports to order approvers that include the list of items being ordered that need to be approved. Approve/reject button included in the email.
- Reports about current orders to suppliers
- Reports about item usage and inventory turns
- Reports on expiring items

Track consignment inventory with ease

Track usage of consigned or customer-owned inventories. Managing consigned inventory is easy with TrackStock because we capture all usage transactions, allow the distributor to invoice accurately, and provide one set of books for reconciliation for the end-user and distributor.

Testimonials

"In the past, I spent at least two hours a day personally counting materials for the next day's jobs. With eTurns it only takes me 5 minutes every two weeks — it gives me data on usage, quantity on hand, min/max levels and much more. And I like the ease-of-use."
—Jason Barron, Field Operations Manager, M&L Electrical

"eTurns has live capture of parts usage, unlike our JD Edwards ERP. With eTurns on our 75 service trucks, we decreased line items from 315 to 170 and inventory from $20k to $14k on each truck. eTurns helped bring our carrying costs from $1.6M to $875K, for a savings of $725,000 a year. We reduced our 8 people in procurement to 3 and redeployed those people to dispatch and customer service."
—Carlos Echazabal, Sr. Director of Operations, Service America

Free 30-day trial with training and support. Simple setup.

- ✔ Sign up at www.eturns.com
- ✔ Upload your item list and the name/address of your rooms/trucks
- ✔ Apply QR code labels we send you to your bins or shelves
