

## eTurns TrackStock Overview

"We onboarded just under 1000 items and are adding more daily. eTurns' customer service has gone above and beyond. TrackStock has decreased from 1 week to 1 day the time it takes us to do monthly physical inventory counts."

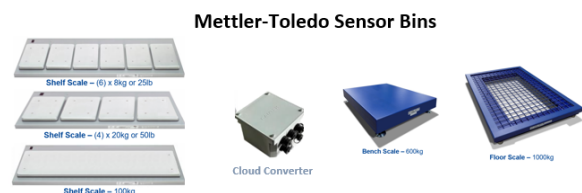

—Jennifer Maher, Asst. Business Mgr.  
Washington University School of Medicine

The TrackStock app is McKesson's partner offering for integrated inventory replenishment that does orders, counts, receives, pulls, transfers, and tracking usage. Orders are sent electronically to McKesson through the TrackStock app which displays "on order", "backordered", or "shipped". It uses min/max levels to trigger auto-replenishment orders to any supplier. TrackStock's AI Analytics Dashboard optimizes inventory to save costs.

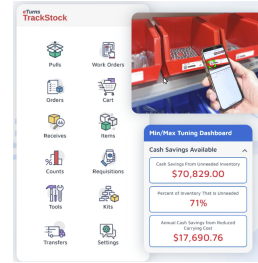

### eTurns TrackStock offers 4 levels of automated replenishment

TRACKSTOCK REPLENISH	TRACKSTOCK MANAGE LITE	TRACKSTOCK MANAGE	TRACKSTOCK OPTIMIZE
<ul style="list-style-type: none"> <li>✓ Scan barcodes to order or count</li> <li>✓ Unlimited users, items, suppliers</li> <li>✓ Barcode label designer</li> <li>✓ Certification: SOC II Type 2</li> <li>✓ User permissions Audit</li> <li>✓ trail</li> <li>✓ Set min-max levels to auto-replenish from counts</li> <li>✓ Alerts dashboard with analytics</li> <li>✓ Basic reporting</li> </ul>	<ul style="list-style-type: none"> <li>✓ <b>All features of Replenish</b></li> <li>✓ Track usage, orders, receives, and quantity on hand</li> <li>✓ Schedule email alerts</li> <li>✓ Track serial numbers, lot numbers, and expiration dates</li> <li>✓ Patient charge capture to automate billing</li> <li>✓ Additional reports</li> <li>✓ User-defined fields available in all transactions</li> </ul>	<ul style="list-style-type: none"> <li>✓ <b>All features of Manage Lite</b></li> <li>✓ Set min/max levels to auto-replenish after usage</li> <li>✓ Track items used in procedures</li> <li>✓ Advanced reporting: customize and schedule 50 reports</li> <li>✓ Quick lists, staging, transfers, moves, returns</li> </ul>	<ul style="list-style-type: none"> <li>✓ <b>All features of Manage</b></li> <li>✓ Optimize min/max levels with Min/Max Tuning Dashboard</li> <li>✓ Equipment maintenance tracking</li> <li>✓ Instrument check in/out</li> <li>✓ Requisitions, kitting</li> <li>✓ Quickbooks integration</li> <li>✓ Quotes and quote-to-order</li> <li>✓ Up to 80 customizable reports</li> </ul>

eTurns is a leader in auto-replenishment and optimization software for stockrooms and service trucks. We have more than **1,600 customers, including:** United Airlines, Becton-Dickinson, Border States, Medline, Graybar, Gexpro, Rexel, Tesla, SpaceX, Cisco, Intel, Rolls Royce, Shell, Northrop Grumman, General Atomics, Siemens, University of California at Davis, and others.

# eTurns TrackStock Benefits

## Customer-managed inventory (CMI) app for self-service

Companies who want to control their own replenishment can use TrackStock for orders, counts, and pulls that track item usage and trigger auto-replenishment orders with min/max settings. Use charge capture to automate billing.

## Easy to use QR code scanning

The TrackStock scanning app is 10x faster than using e-commerce or spreadsheets to reorder from McKesson and other suppliers. One scan captures supplier/item/package/quantity/location.

## Procurement cost savings

Automated orders are triggered by min/max levels, preventing the need to type in POs, which reduces procurement labor by up to 90%.

## Supplier independent

Send replenishment orders to any supplier

## Reduced risk

eTurns is SOC2 Type2 compliant and vetted by McKesson to securely provide automated orders

## Get AI analytics to optimize inventory levels and save cash

The TrackStock AI Analytics Dashboard displays what current and optimal inventory levels are as well as how much the company can save by moving min/max settings to optimal levels.

## Customize and schedule email alerts for over 80 reports, such as:

- Reports to order approvers that include the list of items being ordered that need to be approved. Approve/reject button included in the email.
- Reports about current orders to suppliers
- Reports about item usage and inventory turns

## Use eLabels, SensorBins, vending or RFID digital kanban

TrackStock offers cutting-edge IoT technology for easy auto-replenishment. With eLabels, you simply push a button to send a digital replenishment order. SensorBins offer "no-touch" weight-based replenishment. With RFID, you scan an empty bin past an RFID tower to trigger reorders. Vending options available.

### Testimonials

"Global HOPE is using TrackStock to remotely track usage of the medical supplies and medicines we send to our facilities in Africa. TrackStock gives us the ability to deliver customized reports to our donors about how we are using their donations. It also helps us track lot numbers and expiration dates of the supplies. The app streamlines the entire replenishment process of tracking, ordering, reviewing, approving, purchasing, receiving, and reporting, all remotely from Texas!"

—Derek Brown, Global HOPE Childrens' Hospital

"Trackstock has a great user interface that makes processing stock straightforward. The dynamic search with its partial matching is particularly impressive making the system accessible to a wide variety of users. Combine this this with all our essential EMS requirements, you have a solution that is economic at small scale with the scalability for any operation. Our experience of this system had been further enhanced by the quality customer service that accompanies it."

—Hannah Hewitt, LIVES (EMS in UK)

## Free 30-day trial with training and support. Simple setup.

- ✓ Sign up at [www.eturns.com](http://www.eturns.com)
- ✓ Upload your item list and the name/address of your rooms/vehicles
- ✓ Apply QR code labels we send you to your bins or shelves
- ✓ Download the eTurns TrackStock app from the App Store or Google Play
- ✓ Start scanning to order, count or use inventory to trigger replenishment
